

TECHNICAL BULLETIN:

Loadmaster® Rackmount Case: Latch/Hinge

Product(s) Affected: Rotomold Product Line.

DETAILS:

Loadmaster product standard package now includes updated latch with larger wing, as well as more robust hinge. Larger wing on updated latch offers greater leverage and easier operation than previous latch. New hinges constructed with heavier material and lower profile than previous version. Changes allow hinges to be fully protected by shell features and increase durability in larger size transit cases. All new Loadmaster transit cases quoted and produced from this point forward will use this new hardware, unless sales requests usage of old hardware to match existing programs. All existing designs will continue to use old hardware, unless sales requests new hardware to be used.

LIMITATIONS:

Updated latch cannot be used on cases with latch indent narrower than 1.75" (excluding use with outdoor product cases and some 3-rib cases).

TECHNICAL

- Material: AISI 300 Series - Stainless Steel.
- Finish: Clear Passivate or Black Oxide.

Hardware Color	Old Latch Assembly P/N	New Latch Assembly P/N	Old Hinge Assembly P/N	New Hinge Assembly P/N
