

TECHNICAL BULLETIN:

Loadmaster® Rackmount Case: Stacking Latch

PART NUMBER: 22905001

DETAILS:

Patent pending, Stacking Latch is designed to maximize stability of stacked rackmount cases in static positions. Manufactured from chemically resistant acetal plastic to optimize strength and flexibility of attachment. Compatible with all standard Loadmaster™ Rackmount Cases. In stacked position, Stacking Latch on upper case is released from stowed position with downward push to tip of latch. It then rotates past cap on lower case and is pulled toward user. Acuate latch conveniently by slightly pulling it with thumb on upper grip points and remaining fingers on back grip points behind the hook.

TECHNICAL

- *Material: Stacking Latch Hook: UV modified Black Copolymer Acetal. Stacking Latch Strike: Black Makroblend PC/PCT blend. Spacer/Reducer: UV modified Black Copolymer Acetal Attachment: Tri-Lobe Screws (8 each).*
- *Quantity:*

	v/8300	7500/8500	7900/8900
Strikes	6	6	12
Hooks	2	2	4
